Security Audit Summary Report

Generated by: Operations Console (Admin) — Date: 2026-07-12 01:06:31

1. Executive Summary

This document provides a cryptographic security snapshot of registered hybrid cloud nodes across AWS, Azure, and GCP subnets. Anomaly scores are calculated dynamically by Particle Swarm Optimization tuned Random Forest models.

2. Threat Analysis Overview

Total Monitored Nodes: 36

Telemetry records analyzed: 5645

Alert logs generated: 15075

Security Compliance Level: 100% SECURE

All cryptographic ledger blocks are valid and signed.
